

Project Rationale:

What does this product do and why is it useful.

This product finds the top 10 best selling books on the website.

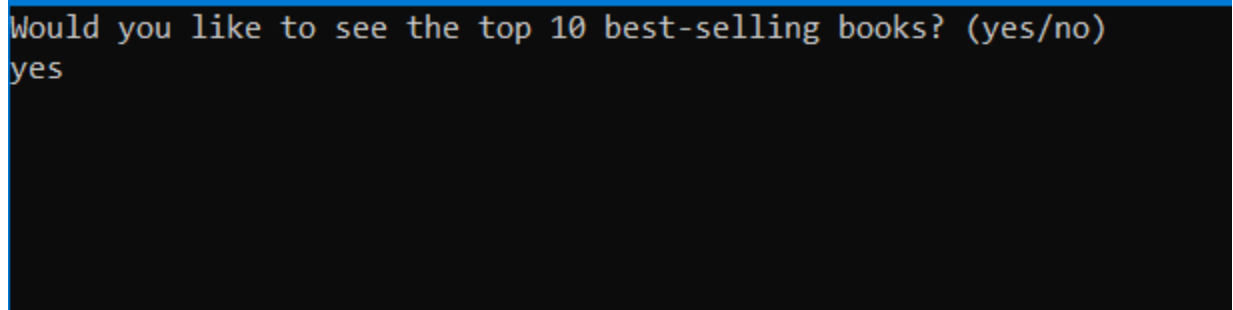

This product is useful for finding popular books, the price of them, the author, and the book rating.

User Documentation:

How does a user run the program and use the features

All the user needs to do is run the program and they will be able to answer whether or not they would like to see the top ten best selling books and the program will scrape the website's data and construct a file for you that holds information about the most popular books, authors, price, and star rating.

Implementation Details: Screenshots of the program.

```
Would you like to see the top 10 best-selling books? (yes/no)
yes
```

A screenshot of a terminal window with a black background. The prompt "Would you like to see the top 10 best-selling books? (yes/no)" is displayed in a light blue font. The user has entered "yes" in a light green font.
