

Bug Report: #1

Summary: Publish date is “Unknown”

1. Environment

- **Device/Platform:** Windows 11, Desktop

2. Steps

Run code

Answer if you would like to scrape data from a website to find the top 10 best selling books

After running code, the code will construct a text doc with the information

3. Expected Result

the code will construct a text doc with the information with star rating, publish date, price, and author

4. Actual Result

It for some reason is unable to find the date it was published in so it may be an error code or the website doesn't give info on the publish date.

5. Screenshots/Recordings

```
2. Set Me Free
Price: £17.46
Star Rating: 5 stars
Author: Young Adult
Publication Date: Unknown
URL: https://books.toscrape.com/catalogue/set-me-free_988/index.html
```

6. Additional Context

We will work forward on developing and solving how to fix this error.
